

1 Overview

The **National Institute for Transportation and Communities** (NITC) is a program of the [Transportation Research and Education Center](#) (TREC) at Portland State University. NITC is the U.S. Department of Transportation's national center for livable communities and one of the national university transportation centers. Successful research proposals will fit the NITC theme, and link to U.S. DOT priorities, specifically mobility and safety.

NITC is a Portland State-led partnership with the Oregon Institute of Technology, University of Arizona, University of Oregon, University of Texas at Arlington, and University of Utah.

We estimate awarding up to **\$450,000** to research projects that support NITC's theme. Individual project requests should range from \$50,000 to \$75,000. Projects must focus on research. All projects submitted for this RFP will undergo external peer review using criteria listed in section 4.1. The proposals will also be scored by NITC staff based on programmatic criteria outlined in section 4.2. The NITC Executive Committee will review the ranked projects and approve awards. All awards require a 1:1.2 non-federal match as outlined in section 6.1.

Improving the
mobility of people
and goods
to build strong
communities

1.1 Key dates

Abstracts due: June 3, 2021

Proposals due: July 2, 2021

Project selection, Awards, and Task Orders: August -- September 2021

Projects begin: October 1, 2021

Projects end: December 31, 2022

2 Theme and Goals

The NITC theme connects directly with the U.S. DOT goal of **improving the mobility of people and goods to build strong communities**.

2.1 NITC Theme

All proposals must be consistent with this theme, as defined below:

- Increasing access to opportunities. Well-connected regions and communities can improve social equity by providing access to jobs, services, recreation, and social opportunities. Research should examine barriers to access, including the connections between transportation, land use, and housing. It should look at how to overcome these barriers and improve accessibility, affordability, and equity in our communities.
- Improving multi-modal planning and shared use of infrastructure. Improved mobility requires a range of options for moving people and goods. As concepts of mobility evolve, research is needed to understand how people and firms make mode choices so that we can design better multimodal systems. Research should examine how different modes can share our infrastructure safely. It should look at how cities and regions can better plan for and prioritize multi-modal transportation, integrated with land use.
- Advancing innovation and smart cities. The growth of urban areas of all sizes requires the innovative use of technology and new mobility options. Smart cities research should examine the feasibility of integrating connected and automated technologies in our cities and overcoming the social, political and economic barriers to implementation. This includes ensuring that smart cities improve access for all people and modes.
- Developing data, models, and tools. Our complex transportation system demands better data and tools for decision-making. Research is needed to develop tools to collect and analyze multi-modal data from a variety of sources, aimed at optimizing the use of the system. These new models and tools should examine the implications of changes to the system on a range of outcomes including mobility, economic equity, the environment, and health.

2.2 Funding goals

In addition to the NITC theme, the Executive Committee is particularly interested in projects that meet one or more of the following goals:

- Influencing practice and policy. This can be demonstrated in your proposal by including transportation agencies as collaborators or beneficiaries. Please use the Technology Readiness Level to assess how close your project may be to implementation.
- Having a national impact, which goes beyond any one of our metro regions.
- Building on existing expertise in research topics consistent with our theme.
- Promoting racial and social equity in transportation.

If you have any questions about whether your proposal topic is appropriate, please contact your university's Executive Committee member or NITC staff in advance.

3 Technical Readiness Level

As part of NITC's Technology Transfer plan submitted to the US DOT, we have a Technical Readiness Level (TRL) scale, as shown in Table 1. Two of the primary goals for technology transfer of NITC projects are to move research into practice and to use innovative approaches to communicate research results. As part of the NITC competitive grant application, PIs must address the question of technology transfer in their project proposals.

Table 1: NITC's Technology Readiness Level (TRL) Scale

Scale	Level	Description	Action Required
1	Basic Research	No implementation expected - basic research, syntheses, exploratory, etc.	Dissemination of results
2	Development	Research findings are not yet ready for deployment or implementation. Project aims to further develop research.	Dissemination of results
3	Proven Concept	Research findings are proven valid in a laboratory or individual environment, but not ready for deployment at a "larger" scale.	Dissemination of results
4	Deployment	Research project targets specific practice, application or agency. Examples include demonstrations, pilot projects, proof of concept, feasibility studies.	Dissemination of results, Implementation Plan
5	Implementation	Adoption of results into practice. Examples include: informing or updating policy, design guidance, specification updates, process change, commercialization.	Dissemination of results, Implementation Plan

4 Eligibility

Faculty members and research faculty must be from Portland State University, Oregon Institute of Technology, University of Arizona, University of Oregon, University of Texas at Arlington, or University of Utah to be eligible to serve as PIs and submit proposals. The lead PI must hold a primary, full-time, paid appointment in a research or teaching position, with exceptions granted for family or medical leave, as determined by the submitting institution.

Proposals may include multiple investigators, and collaborative projects across disciplinary and campus boundaries are encouraged. Proposals including multiple investigators must identify one lead PI contact responsible for reporting and associated administrative tasks. PIs may submit more than one proposal. NITC Executive Committee members are allowed to submit proposals, but are not allowed to be involved during deliberations and decisions related to their proposals and will not be privy to the information discussed.

5 Criteria for Evaluation

All proposals will be reviewed externally by at least three reviewers, including at least one practitioner from the public or private sector. Proposals are also scored by NITC staff using the programmatic criteria. The external peer review and programmatic numerical scores are then used in the proposal selection process. The Executive Committee selects the final slate of proposals via consensus. Executive Committee members with conflicts of interest around specific projects will excuse themselves from discussions that could influence funding outcomes from which they would benefit.

5.1 External Review Criteria

External reviews are single-blind and reviewers will remain anonymous. Reviewers are selected from universities, local, regional and national agencies, private sector practitioners, and other university transportation centers. An established procedure for reviewer conflict of interest is followed. External reviewers assess the proposals based on intellectual merit, broader impacts, relevance to NITC's theme and the national transportation research agenda. The specific criteria include:

- **Intellectual merit.** What is the intellectual merit of the proposed activity? How important is the proposed activity to advancing knowledge and understanding within its own field or across different fields? How well qualified is the proposer (individual or team) to conduct the project? To what extent does the proposed activity suggest and explore creative and original concepts? How well conceived and organized is the proposed activity? Is there sufficient access to resources?
- **Outcomes and Impacts.** Does the proposed activity have broad impacts? How well does the activity advance discovery and understanding while promoting teaching, training, and learning? To what extent will it enhance the infrastructure for research, education and technology transfer, such as partnerships or activities beyond the funded project that will live on past the life of the specific project and further NITC's objectives? Will the results be disseminated broadly to enhance scientific and technological understanding?
- **Budget.** Is the project budget reasonable given the tasks proposed? Reasonable budgets match the amount of work with the amount of project funding.
- **Overall Rating.**
 - Excellent: Outstanding proposal in all respects; deserves highest priority for support
 - Very Good: High quality in nearly all respects; should be supported if at all possible
 - Good: A quality proposal worthy of support
 - Fair: Proposal lacking in one or more critical aspects; key issues need to be addressed
 - Poor: Proposal has serious deficiencies

5.2 Programmatic Criteria

- Each proposal is also scored by NITC staff using programmatic criteria. These criteria are:
- **Does the proposal fit the NITC theme and meet round 5 funding goals?**
- **To what extent is transportation the focus?** Priority is given to projects where the primary focus is on transportation.
- **To what extent does the proposal support and mentor students?** Priority will be given to projects that demonstrate meaningful student involvement in the project. Examples include students being research assistants, co-authoring publications, and making presentations. Tasks performed by students should be included in section 6 of your proposal.
- **Does the proposal support untenured tenure track (junior) faculty?** Additional priority will be given to core transportation junior faculty. Core faculty refers to faculty members who teach transportation classes and/or whose research agenda focuses on transportation.
- **To what extent does the proposal leverage matching funds?** Priority will be given to external cash match and active in-kind match (e.g., active participation of partners in the research project).

- **To what extent does this project support substantive and meaningful collaboration?** Collaboration may include partners from more than one discipline; external agencies, nonprofits, private industry, or other state/country agencies, etc. Priority will be given to proposals that engage in collaboration. Collaborative proposals should clearly describe the structure of the collaboration, the management and decision-making process, and justify the need for collaboration on the proposed research.
- **To what extent does the project support multi-disciplinary and/or multi-campus collaboration?** Priority is given to projects that demonstrate meaningful collaboration. Examples include Co-PIs from other NITC campuses and disciplines.
- **Is the research relevant nationally?** Priority is given to projects that involve national data sets or multiple sites. PIs need to demonstrate relevance of research at a national level.
- **Does the proposal support equity and diversity?** How well does the proposed activity broaden the participation of underrepresented groups (e.g., gender, ethnicity, disability, geographic, modal, etc.) through research as well as participation of underrepresented groups (e.g., students, stakeholders) in research activities? Priority will be given to projects that demonstrate the potential to increase access to resources and opportunities for historically underserved populations.
- **What is the PIs past performance on other UTC projects (on time reporting, etc.), likelihood of successful completion, potential for technology transfer?** NITC will not accept proposals from PIs or Co-PIs with incomplete projects and outstanding final reports.

6 Project Requirements

PIs must provide semiannual progress reports and performance metrics related to their funded research needed by NITC to meet federal reporting requirements. Adequate progress and performance on previously funded research is an overriding consideration for the funding of future grants, including this RFP. Those that have not submitted progress reports or final reports will not be considered for funding and risk having funds withheld from current grants. Similar restrictions will apply to any future NITC funding opportunities.

6.1 Technology Transfer Plan

To comply with federal requirements, NITC will work with PIs to develop a technology transfer plan.

6.2 Progress Reports

Semiannual progress reports are required as long as the project is active. These reports will support NITC's federal reporting responsibilities. Reports will be submitted online and include: accomplishments, dissemination activities, products (e.g. submitted publications, conference presentations, etc.), impact of the project, and changes/problems. As part of each progress report, we will also require information regarding undergraduate and graduate students participating in the research, as well as information relating to publications and presentations presented at academic/professional meetings resulting from the funded research.

6.3 Publications and Presentations

PIs and students who are funded by NITC will be expected to prepare articles based on research findings for publication in refereed journals and make presentations at national conferences. Through these venues, researchers and students will receive additional peer-review feedback on their work and should incorporate this into their projects. Electronic copies of all papers submitted to journals or conferences that

are based on the project research should be provided to NITC. NITC support must be acknowledged in all work that results from NITC funding. Student contributions to research should be acknowledged in publications via acknowledgement, footnote, or co-authorship.

6.4 Final Reports/Products

Research projects will produce a final report. The report will be sent out for external review. Alternatively, a published article based on the work in an academic journal will be accepted in lieu of peer review. For projects funded by this RFP, PIs should plan to submit a draft report conforming to style and accessibility guidelines (template is available on the NITC website) no later than **one month** prior to the project end date. Final Reports will need to be 508 (disabled end-user) compliant. These guidelines have been updated and can be found in the PI Handbook.

Final invoices will only be paid once the draft report is submitted. The report should document the research project in total, including a complete description of the problem, objectives, approach, methodology, findings, conclusions, and recommendations. The report should document all data gathered, analyses performed, and results achieved.

Unless the work is already published in a peer-reviewed journal, the draft report will undergo the peer-review process and, as applicable, will also be reviewed by at least one representative of the matching/partner entity. PIs are responsible for incorporating peer review comments into the final report. In addition, an editor will review the report to ensure standard formatting requirements are met.

When a report or other product (handbook, etc.) is produced as part of a joint effort, NITC will work with the matching/sponsoring entity to ensure that one report will meet the requirements of all partners. All final reports will be produced as part of a numbered report series, and will include the US DOT disclaimer and NITC funding attribution. All final reports will be posted online. More details about project requirements can be found in the "[Principal Investigators' Handbook](#)" posted online.

7 Budget

Applicants must use the NITC Budget Form. Proposal budgets should be cost-effective, and primarily direct new and original work. Funds should be spent in a manner that provides publishable and/or implementable results. In general, faculty salary (summer or academic year), student support, and tuition/fee reimbursement are allowable expenses. An appropriate amount of funding for travel for data collection purposes and materials and supplies may be included, provided that they are a direct expense related to completing the work. Please provide a narrative in the budget of how these research travel funds are planned to be used.

The project budget should NOT include travel funds to present project results at conferences. Instead, each funded proposal will be awarded a separate travel budget of \$3,000 to the lead institution. This travel budget will be administered separately by the lead PI's home institution and will be available to PIs and Co-PIs to present project results.

Funding for students is expected in all projects, such as research assistant tuition and salary. Federal indirect costs (overhead) specific to each NITC university and OPE (fringe benefits) should also be included in the budget. *Tuition charges are not subject to indirect costs.*

Equipment purchases (equipment is generally defined as items over \$5,000) and international travel are not permitted unless specific justification is provided and *prior* approval is obtained from NITC and the U.S. DOT. Budget for expenses normally considered part of university F&A (phones, facilities, regular office supplies, computers, etc.) should not be included.

Non-NITC partners including universities and private consultants may be only included in the proposal if the role is less than 20% of the requested project budget. If PIs anticipate the **sub-consultant role will be 20% or more** of the requested project budget, justification and budget details must be submitted to Brendan Williams (brendan.williams@pdx.edu) at least two weeks before the proposal deadline for approval by the Executive Committee. Approval is granted when it is determined that success of the project requires significant involvement, 20% or more of the budget from the sub-consultant and that the expertise and effort required of the sub-consultant is not available from within the NITC partner campuses.

Funding for salary that goes beyond normal academic or summer compensation will not be allowed. In the case of joint projects with faculty from other NITC universities, the second university activity should be budgeted as a separate budget for that university. In addition:

- Projects should be budgeted to begin no sooner than October 1, 2021 and completed no later than December 31, 2022. Please plan to submit the draft final report no later than one month prior to the project end date.
- New awards to prior investigators will depend on successful completion of previously-funded projects and timeliness of research progress and reporting.
- NITC reserves the right to request reductions or other changes to budgets of submitted proposals.
- Awards are cost-reimbursable.

7.1 Matching Funds

All awards require 120% non-federal match in the form of cash or in-kind services from project partners—including universities, transportation and other public agencies, industry, and nonprofit organizations. Match funding is a good indication of partner commitment to the project and will be considered in the programmatic review.

In general, federal funds are not eligible as match with the following exceptions: specifically funds under U.S.C. Title 23, Sections 503, 504(b), or 505, which refer to technology deployment, local technical assistance, state planning and research (SPR) programs and national cooperative highway research program (NCHRP) managed by the Transportation Research Board.

PIs must indicate match on the Budget Form *Awards will not be finalized without confirmation of the match commitment*. Sample third party match commitment letters can be found on the NITC website. For more information regarding Match, please refer to the “Match FAQ” document found at <https://nitc.trec.pdx.edu/for-researchers>.

NITC follows the rules set forth in 2 C.F.R. 200.306, https://www.ecfr.gov/cgi-bin/text-idx?SID=74f820833867201a25d3f0148ada5daa&mc=true&node=se2.1.200_1306&rgn=div8, for the use of in-kind and cash contributions as matching funds. The start date of matching funds is November 30, 2016.

8 How to Apply

Applicants must submit their application package to the online Project Proposal Management System (PPMS). As you are getting ready to apply, please consider the following:

- New to PPMS? Create an account: <http://ppms.trec.pdx.edu>. User guides for PPMS can be found in the Resource Section of [NITC's For-Researchers webpage](#).
- Don't have an Open Researcher and Contributor ID or ORCID yet? Sign up here: <https://orcid.org/>. All investigators listed on the proposal form are required to provide an ORCID.

8.1 Project Abstracts

The abstract should consist of 1-2 paragraphs describing the project objectives and proposed methods and briefly explain how the project fits the NITC theme. The abstract is used for two purposes: to verify that the project fits the NITC theme and to aid staff in identifying potential peer reviewers.

To submit your abstract:

- Log into PPMS (<http://ppms.trec.pdx.edu/>)
- Select the 'NITC 16 Round 5' grant cycle
- Enter a title and abstract for your project

Abstracts are due on **June 3, 2021**. **PIs may only submit a proposal if they submitted an abstract by this deadline.**

8.2 Project Proposals, Data Management Plan (DMP), and Budgets

Forms for the proposal and budget as well as a DMP guide that includes a DMP template can be found on the NITC website (<http://nitc.trec.pdx.edu/for-researchers>). **Do not use prior year forms.** Proposals are typically 10 to 12 pages long. The DMP is limited to two pages. Please adhere closely to the template when creating your DMP.

To finalize and submit your application:

- Save the proposal form and DMP as a PDF (as separate documents) and the budget form as an Excel spreadsheet
- Log into PPMS, select the project, and enter the remaining project information (Co-PIs, Budget information, Match, etc.)
- Upload your Proposal, DMP, and Budget

Proposals, budgets, and DMPs are required to qualify for funding. Incomplete or late application packages will not be considered.

9 Institutional Approval

NITC grants should be treated similar to other external grants. Accordingly, at each institution, proposals should be reviewed and approved by their home institution's research administration office prior to submitting your proposal in PPMS. A specific Letter of Commitment from the PI's home institution will acknowledge this approval. The letter must indicate the institution's amount requested and the amount of match (including 3rd party) they will document. The letter must be signed by an institution's official

authorized to obligate cost share. If applicable, 3rd party letters of intent or other documentation of match commitment should also be included with the Proposal Form. For Portland State University only, a Proposal Internal Approval Form will be submitted in lieu of an Institutional Letter of Commitment. Further questions regarding university approval should be directed to the home university research administration office or the home university Executive Committee member:

- **Oregon Tech:** Sponsored Projects and Grant Administration: <http://www.oit.edu/faculty-staff/sponsored-projects-grants-administration>
Preliminary approval form: <http://www.oit.edu/docs/default-source/spa/proposal-approval-form.pdf?sfvrsn=4>
- **PSU:** Proposal Internal Approval Form (PIAF): <https://nirc.trec.pdx.edu/for-researchers>
- **UO:** Apply through Electronic Proposal Clearance System (E-PCS) and Sponsored Projects Services: <http://orsa.uoregon.edu/>
- **UA:** Engineering Research Administration Services (ERAS) or Sponsored Projects & Contracting Services (SPCS): <https://rgw.arizona.edu/administration/getting-started>
- **UTA:** Office of Grants and Contract Services: <http://www.uta.edu/research/administration/departments/gcs/university-process/index.php>
- **UU:** UU Office of Sponsored Project: <http://www.osp.utah.edu/>

10 Contact Information

For questions about research proposals, please contact Brendan Williams, Research Program Administrator, 503-725-2838, brendan.williams@pdx.edu. Each campus has a representative on NITC's Executive Committee who can discuss the process:

- Marc Schlossberg, University of Oregon, 541-346-2046, schlossb@uoregon.edu
- Keith Bartholomew, University of Utah, 801-585-8944, bartholomew@arch.utah.edu
- Roger Lindgren, Oregon Institute of Technology, 541-885-1947, roger.lindgren@oit.edu
- Liming Wang, Portland State University, 503-725-5130, limwang@pdx.edu
- Arlie Adkins, University of Arizona, 503-880-3110, arlieadkins@email.arizona.edu
- Stephen Mattingly, University of Texas, Arlington, 817-272-2859, mattingly@uta.edu

11 Proposal Checklist

- **Proposal document** (PDF). Did you include the ORCID of all investigators? Are the preparation of your data package and its documentation included in your tasks?
 - Does the proposal include the following documents?
 - Institutional Letter of Commitment – except PSU
 - Proposal Internal Approval Form (PIAF) – PSU only
 - If applicable, 3rd party match documentation
 - Proposals without university approval will not be considered.
- **Budget** (Excel file; current year form – old forms will not be accepted).
 - Be sure to review all the instructions listed on the worksheets of the budget template. Work with your university research office to ensure the budget is correct. The submitted budget must also include partner's budget.
- **Data Management Plan** (PDF). Did you follow closely the guidance provided in the template?
- Please contact the following regarding Institutional Letter of Commitment for your institution:

- **Oregon Tech:** Sponsored Projects and Grant Administration
- **UO:** Sponsored Projects Services (SPS)
- **UTA:** Office of Grants & Contract Services
- **UA:** Engineering Research Administration Services (ERAS) or Sponsored Projects & Contracting Services (SPCS)
- **UU:** Office of Sponsored Projects (OSP)
